Methods

Seed cells in control, drug A, and drug B wells, 5 replicates each.

Step 1: add 100 uL media to all wells; pipette slowly down the wall.
Step 2: add vehicle to control wells.
Step 3: add drug A to drug A wells; do not mix up and down after adding.
Step 4: add drug B to drug B wells.
Step 5: incubate 30 min.
